

Tastotherm Profi Series

Temperature measurement by contact

Tastotherm Profi - Series
precise, fast and easy to use

Microprocessor controlled instruments for accurate temperature detection with thermocouple probes type K. These units are found in nearly every industrial and research area. Technical Data
Tastotherm MP 2000

- Detection with thermocouple probes type K

- Measuring range:

- 200 ... 1300°C

- 328 ... 2372°F

- Sampling rate: 3 values/ s

- Interface: RS232 Tastotherm MP 2001

- Detection with thermocouple probes type K

- Measuring range:

- 200 ... 1300°C

- 328 ... 2372°F

- Sampling rate: 5 values/ s

- Interface: RS232

- Internal memory for 956 measuring values incl. date and time

Typical applications

Quality control

Food fabrication

(baking, freezing, roasting)

Maintenance and servicing

Work shop and production area

Laboratory and research
